V. RECENT MAIZE PUBLICATIONS

__________. Anthocyanin synthesis in maize, the interaction of A₂ and Pr in leucoanthocyanin accumulation. Records of Genet. Soc. of Amer. 24:568. 1955. (Abstract)

Jucci, C. Hybrid maize, a triumph of modern genetics. Ital. Agric. 91:405-414. 1954.

Laughnan, J. R. Intrachromosomal association between members of an adjacent serial duplication as a possible basis for the presumed gene mutations from A\textsuperscript{b} complexes. Records of Genet. Soc. of Amer. 24:580. 1955. (Abstract)

Painter, R. H. Insects on corn and teosinte in Guatemala. J. Econ. Entom. 48:36-42. 1955.

Psareva, M. M. Pollen viability and the receptivity of the stigmas in maize. Agrobiologija 4:118-120. 1954.

________. Genetics of maize (Jap.) in Takenaka's "Experimental methods of plant genetics" (Jap.):23-32. 1955.
